RFT ANALYSIS OF CAUSES FOR NON-FULFILLMENT OF PRODUCTION QUOTAS (2

25X1X

25X1C

[REDACTED] analyzes the causes for non-fulfillment of the gross production quotas as of 30 April 1951, compiled by the Production Management Department of the RFT (Federation of People-Owned Enterprises for Radio and Telecommunications) in Leipzig.

The analysis is in the form of a list containing the following information: (a) code number [plan position number?] of product and, in most cases, names of producer plants; (b) name of product (examples: high-voltage condensers, cable and overhead-line fittings, electric signal and control devices, radio equipment, navigating instruments, blanking and cutting tools); (c) percentage of quotas fulfilled for each product; (d) reasons why quotas were not fulfilled. In almost all cases, shortages and inadequate deliveries of various types of materials and equipment accounted for non-fulfillment.

[Foreign language document or a microfilm of it is available from CIA Library, [REDACTED]
